in Northern Cyprus for  
the benefit of everyone*

With long hot summers in Lefkoşa, the Anglo Turkish Association of Northern Cyprus (ATA) have ensured that the children at the Çağlayan Çocuk Yuvası stay as cool as possible. Complementing the new curtains already installed by the ATA at the home. New air-conditioning units have also been installed both in bedrooms and lounge areas in readiness for when temperatures rise. Osman Karamanli said 'when the ATA suggested the children should enjoy being cool in summer, I never imagined or thought my home would one day have air-conditioning – it's so expensive to install. Thanks once more to the ATA for going above and beyond in thinking of others first and foremost. I thank you!'. ATA's Levent Özerdağ said 'This is the least we can do for the children, after all, we all have air-conditioning at our homes. Why shouldn't the children at this home have the same'.
